

Chapter 9 Project: Genetic Engineering

You were just hired as the coordinator of school lunches at the local high school. The vendors you work with are now pushing transgenic products (genetically engineered) versus the traditional products of agriculture. Which do you think you would include with your purchases?

You will work in groups of two and discuss this problem. Each group must then give a 5 – 10 minute presentation explaining the Pros and Cons of transgenic products (genetically engineered) and ultimately tell us your decision and why you made that choice.

Thursday 4/15 & Friday 4/16 – Library

Monday 4/ 19 – Classroom to prepare presentations

Tuesday 4/20 – Presentations begin
